- (3) Printed copies of the maps referenced in Subsection (2) shall be available for inspection by the public at the offices of the Utah Association of Counties.
- (4) The state finds with respect to the grazing zones described in Subsection (2) that:
- (a) agricultural livestock industry on the lands comprising these zones has provided a significant contribution to the history, customs, culture, economy, welfare, and other values of each area for more than 100 years;
  - (b) the potential for abundant natural and vegetative resources exists within these zones if managed properly, that will support and expand continued, responsible agricultural livestock activities and wildlife habitat;
  - (c) agricultural livestock activities in these zones and the associated historic resources, human history, shaping of human endeavors, variety of cultural resources, landmarks, structures, and other objects of historic or scientific interest are worthy of recognition, preservation, and protection;
  - (d)
    - (i) the highest management priority for lands within these zones is the preservation, restoration, and enhancement of watershed and rangeland health to sustain and expand forage production for both livestock grazing and wildlife habitat, and the restoration and development of historic, existing, and future livestock grazing and wildlife habitat resources in order to provide protection for the resources, objects, customs, culture, and values identified above; and
    - (ii) notwithstanding Subsection (4)(d)(i), if part or all of any zone lies within a sage grouse management area, then the management priorities for such part shall be consistent with the management priorities set forth in Subsection (4)(d)(i) to the maximum extent consistent with the management priorities of the sage grouse management area;
  - (e) subject to Subsection (4)(d)(ii), responsible development of any deposits of energy and mineral resources, including oil, natural gas, oil shale, oil sands, coal, phosphate, gold, uranium, and copper, as well as areas with wind and solar energy potential, that may exist in these zones is compatible with the management priorities of Subsection (4)(d)(i) in these zones; and
  - (f) subject to Subsection (4)(d)(ii), responsible development of any recreation resources, including roads, campgrounds, water resources, trails, OHV use, sightseeing, canyoneering, hunting, fishing, trapping, and hiking resources that may exist in these grazing zones is compatible with the management priorities of Subsection (4)(d)(i) in these grazing zones.
- (5) The state finds with respect to the zones described in Subsection (2) that the historic levels of livestock grazing activity and other values identified in Subsection (4) in each zone have greatly diminished, or are under other serious threat, due to:
- (a) unreasonable, arbitrary, and unlawfully restrictive federal management policies, including:
    - (i) de facto managing for wilderness in nonwilderness areas and non-WSAs;
    - (ii) ignoring the chiefly valuable for grazing designation of the Secretary of the Interior applicable to each of these zones; and
    - (iii) the arbitrary administrative reductions in animal unit months of permitted forage;
  - (b) inflexible federal grazing practices that disallow grazing at different times each year proven to be most effective for maintaining and enhancing rangeland conditions;
  - (c) mismanagement of wild horses and burros resulting in competition for forage by excess and mismanaged populations of wild horses and burros in Beaver and Emery counties;
  - (d) improper management of vegetation resulting in the overgrowth of pinion, invasive species, and juniper, and other woody vegetation that:
    - (i) compromise watershed and rangeland health;

- (ii) crowd out grazing forage;
  - (iii) degrade habitat and limit wildlife populations;
  - (iv) reduce water yield; and
  - (v) heighten the risk of catastrophic wildfire; and
  - (e) other practices that degrade overall rangeland health.
- (6) To protect and preserve against the threats described in Subsection (5), the state supports the following with respect to the zones described in Subsection (2):
- (a) efficient and sustained policies, programs, and practices directed at preserving, restoring, and enhancing watershed and rangeland health to maximize:
    - (i) all permitted forage production for livestock grazing and other compatible uses, including flexible grazing on and off dates adaptive to yearly climate and range conditions; and
    - (ii) forage for fish and wildlife;
  - (b) a cooperative management approach by federal agencies, the state, and local government agencies to achieve broadly supported management plans for the full development of:
    - (i) forage resources for grazing livestock and wildlife; and
    - (ii) other uses compatible with livestock grazing and wildlife utilization;
  - (c) effective and responsible management of wild horses and burros to eliminate excess populations; and
  - (d) effective and responsible management of wildlife habitat.
- (7) The state requests that the federal agencies that administer lands within each grazing zone:
- (a) fully cooperate and coordinate with the state and the respective counties within which each grazing zone is situated to develop, amend, and implement land and resource management plans, and implement management decisions that are consistent with the purposes, goals, and policies described in this section to the maximum extent allowed under federal law;
  - (b) expedite the processing, granting, and streamlining of grazing permits, range improvements, and applications to enhance and otherwise develop all existing and permitted grazing resources located within each grazing zone, including renewable vegetative resources;
  - (c) allow continued maintenance and increased development of roads, power lines, pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies described in this section and consistent with multiple use and sustained yield principles;
  - (d) refrain from any planning decisions and management actions that will undermine, restrict, or diminish the goals, purposes, and policies for each grazing zone as stated in this section;
  - (e) subject to Subsection (4)(d)(ii), refrain from implementing a policy that is contrary to the goals and purposes described within this section; and
  - (f) refrain from implementing utilization standards less than 50%, unless:
    - (i) implementing a standard of less than 50% utilization on a temporary basis is necessary to resolve site-specific concerns; and
    - (ii) the federal agency consults, coordinates, and cooperates fully with local governments.
- (8)
- (a) The state recognizes the importance of all grazing districts on Utah BLM and Forest Service lands but establishes the grazing zones described in Subsection (2) to provide special protection and preservation against the identified threats found in Subsection (5) to exist in these zones.
  - (b) It is the intent of the state to designate additional grazing agricultural commodity zones in future years, if circumstances warrant special protection and preservation for new zones.
- (9) The state calls upon applicable federal, state, and local agencies to coordinate with each other and establish applicable intergovernmental standing commissions, with membership consisting of representatives from the United States government, the state, and local governments to

coordinate and achieve consistency in planning decisions and management actions in zones described in Subsection (2) in order to achieve the goals, purposes, and policies described in this section.

- (10) Notwithstanding the provisions of this section, and subject to Subsection (4)(d)(ii), the state's mineral, oil, gas, and energy policies and plans on land within the zones described in Subsection (2) shall be governed by Sections 63J-4-401 and 63J-8-104.
